MULTISURFACE SPRAY

**DESCRIPTION**

Transparent spray based on modified acrylic varnish, with anti-slip particles and a matte finish. Improves adhesion and reduces the risk of slipping on damp or wet surfaces.

**USE**

Exterior/Interior

Metal

Wood

Asphalt fabric

Glass and ceramic tiles (perform a prior adhesion test)

Granite

PVC and plastic (perform a prior adhesion test)

**property**

Mat

Wash-resistant

Quick and easy application

Quick drying

Transparent

Adhesion on a wide range of surfaces

**TECHNICAL SPECIFICATIONS**

Reference color

ANTI-SLIP MONTOSPRAY

Approximate yield per layer

Depending on the use of the product

Dry to the touch

30min

Drying for reapplication

1-2 hours

Color

Transparent

**SURFACE PREPARATION**

New surfaces

New wood:

The surface must be free of foreign products and/or residues.

Apply to wood with a moisture content of less than 12%.

Apply to healthy, well-degreased, dust-free and dry wood.

Sand and remove any adhesive residue from joints and processing defects.

If the wood shows signs of aging, it must be sanded beforehand and the resulting dust must be removed by brushing or other mechanical means.

Protect areas you don't want to paint.

Generally, remove products that are poorly adhering or in a damaged condition.

Iron, derivative metals and other metals

The surface must be free of foreign products and/or residues.

The surface must be degreased, clean and dry.

On rusty surfaces, rust must be removed by the usual methods recommended by Montó, using a rust inhibitor manufactured by our company, which must be applied beforehand.

Protect areas you don't want to paint.

Generally, remove products that are poorly adhering or in a damaged condition.

**Works (plaster, cement and derivatives, cardboard):** Remove foreign products and/or residues. The surface must be degreased, clean and dry. Remove any efflorescence using traditional methods. Generally remove poorly adhering or damaged products.

**Restoration and****maintenance Varnished**

or painted wood: Always check the adhesion of previous varnish or paint and, if in doubt, remove it.

If in doubt, remove any previous varnish or paint.

If silicone-based cleaning products were used during maintenance, it is recommended to polish the wood until they are completely removed.

**Enamelled iron and derivatives:**

1. On paints in good condition, sand to open the pores, checking that the adhesion is perfect.
2. On damaged paints, remove them by mechanical or chemical methods and treat the surface as a new one.

**HOW TO USE****Application notes**

Shake the container vigorously for approximately 2 minutes to perfectly homogenize the contents.

Perform application tests in a less visible area.

Protect areas that are not to be painted.

Apply from a distance of 25-30 cm from the surface, in light, crisscross layers.

Do not apply the product at high temperatures or on surfaces exposed to strong sunlight.

Ensure good ventilation during drying.

Do not apply if relative humidity exceeds 80%.

Do not use at temperatures below 15°C.

When finished, empty the contents of the spray nozzle with the container turned upside down.

Approximate yield per 400 ml container: 1.2 - 1.6 m<sup>2</sup> (two cross-layers).

Do not walk on the surface for 24 hours after application.
